PRODIGY® service
access number for
your modem to dial.

PRODIGY®

Interactive Personal Service

How to Access the PRODIGY® Service

The first time you use the PRODIGY service, you will be asked to enter primary and alternate phone numbers, and network symbols. Your computer will use these numbers to access the service. The numbers in this Phone Book are for use exclusively by computers.

Your computer and modem are placing a call for you, so please enter only the numbers you would dial if you were placing the call yourself. For example, when calling within your area code, do not include the area code as part of the number.

Entering the alternate number is optional. It will be used only if your primary number is out of service. If that happens, you will be asked if you'd like to try to access the service again, using the alternate number.

On the following pages, you'll find phone numbers listed by state and city.

- Select the number closest to you as your primary number.
- Enter the number and the network symbol.
- Next, enter your alternate number:
 - if the network symbol for this number is Y, select the number for the next closest location as the alternate.
 - if the network symbol is Q, refer to the gray pages of this book for the alternate number.

For example, the primary access number for members living in Greensboro, North Carolina is 273-0332, located in Greensboro. The network symbol is Y. For the alternate number, they can select 883-6121, which is located in High Point, the next closest area. The network symbol there is Y.

On the other hand, for members living in Anaheim, California, the primary access number is 778-0135, located in Anaheim. Since the network symbol there is Q, the alternate number will be found in the gray pages of this book. The alternate number is 852-8141 and the network symbol is Y.

Most of our members can access the PRODIGY service through local phone numbers. Please select and enter the phone number that is best for you in accordance with calling rates in your area.

How to Obtain Updated Phone Numbers

The numbers in this book were current as of the publication date. Updated phone number information is available online by selecting "Phone Numbers" from the About PRODIGY menu. You can also call 1-800-284-5933 and select the option for phone information.

How to Change the Access Number

It's easy to change the phone number and network symbol. Just select **SET-UP** from the Sign-On screen and follow the online instructions.

How to Disable Call Waiting

If you have Call Waiting on your phone service and do not want your PRODIGY service sessions interrupted by incoming calls, you can temporarily disable the Call Waiting feature in most phone service areas. (The Call Waiting feature is automatically restored at the end of your PRODIGY service session.) In some areas, adding ***70**, before the phone number will disable call waiting. Consult your local phone company for more information.

Prodigy Services Company is not responsible for any telephone charges and reserves the right to change phone numbers without notice.

September 17, 1990 edition.

The locations listed in parentheses are the names of the telephone exchanges used by phone companies for billing. For example, the phone number listed as "Fort Worth (Arlington)" is located in the Arlington exchange.

The following numbers will be available when your primary number (with network symbol Q) is not available.

The locations listed in parentheses are the names of the telephone exchanges used by phone companies for billing.

Except where otherwise noted, data is transmitted at 2400 bits per second (bps). You can use any Hayes[®] or compatible 1200 or 2400 bps modem with all of these numbers. (1200 bps modems will receive the service at 1200 bps.)
